EDUCATION

2020 - 2021: Webschool

❖ **Fullstack Developer Course (completion certificate) 335 Academic hours**

❖ **Score 100 on final project**

PORTFOLIO

❖ Tech Ecommerce - online shopping site requiring sign up and login with a strong password.

Built with React hooks with useReducer and useContext for state management in the shopping cart.

Github links: Demo, Tech Ecommerce .

❖ Fullstack arcade - arcade style website with pay-per-play using virtual tokens, use of Paypal to buy more tokens.

User authorization and authentication using node js and JWT on a MYSQL database, includes admin page to block/add/remove members and to control prices.

Github link: Fullstack arcade .

❖ Weather App - using third party API
  get up to date weather in all major
  cities in Israel.

  Github link: Weather App .
